KAYLA YOUNG

Senior QA Engineer | AI Workflows & Internal Tools

Bentonville, AR | Remote | kayla@snackdriven.com
snackdriven.com/portfolio | linkedin.com/in/snackdriven | github.com/snackdriven

SUMMARY

Senior QA Engineer with 6+ years of experience debugging complex software and turning recurring QA headaches into practical workflows. Designs and tests AI-assisted internal tools, brings scattered context together, and turns findings into clear next steps.

EXPERIENCE

Chorus Innovations — Apr 2023 - Present | Remote

Senior QA Engineer — Sep 2026 - Present

- Directed a platform-wide, four-day AI-assisted staging investigation; reviewed evidence for 250 documented findings and organized them into 23 recurring failure patterns to prioritize data risks.

Senior QA Specialist — Sep 2024 - Sep 2026

- Investigated failures in conditional forms, role-based workflows, and data persistence across save and refresh cycles.
- Designed a personal release-reporting workflow that combined Jira status, GitHub pull requests, and release discussions into Google Docs and Confluence updates used by colleagues.

Software QA Specialist — Apr 2023 - Sep 2024

- Tested applications across a React and GraphQL stack and a legacy no-code platform.

Ultranauts Inc — Feb 2020 - Feb 2023 | Remote

Software Quality Engineer II — Oct 2021 - Feb 2023

- Planned exploratory and regression testing for multi-role workflows and complex business rules; identified where automation would justify its maintenance cost.

QA Tester / Software QA Engineer I — Feb 2020 - Sep 2021

Manual and exploratory testing across client projects.

SELECTED PROJECTS

> **Personal QA Workflow.** Designed test-preparation runbooks and review steps that flag missing context. Reworked Kanban lanes from ownership to pipeline stages after trying the board on real tasks.

> **AL80 Studio.** Directed AI-assisted implementation of a keyboard control panel. Debugged a screen that kept the old picture despite successful transfer logs; confirmed timing and view-switch fixes on hardware.

> **Felt Presence.** Shaped an illustrated letter reader for a fictional haunted craft shop, refining seasonal details, visual balance, and reading flow to make room for both atmosphere and usability.

SKILLS & TOOLS

QA: Debugging, exploratory and regression testing, test planning, defect investigation, risk prioritization

AI workflows: Workflow design and orchestration, output verification, tool configuration, Model Context Protocol (MCP)

Tools & technologies: Playwright (AI-assisted investigation), Git, Jira, GitHub Actions, GraphQL, SQL familiarity
