Kayla Young

Senior QA Engineer | AI Workflows & Internal Tools

Bentonville, AR | Remote | kayla@snackdriven.com
snackdriven.com/portfolio | linkedin.com/in/snackdriven | github.com/snackdriven

Summary

QA engineer with 6+ years of experience. I investigate healthcare workflows, define acceptance checks, and design AI-assisted tools that make the work easier to verify.

Experience

Chorus Innovations Apr 2023 - Present | Remote

- Coordinated release readiness across April-October 2026: reconciled scope, prepared release candidates, checked deployed builds, and handed status to engineering and delivery.

Senior QA Engineer Sep 2026 - Present

- Directed a four-day AI-assisted staging investigation. Reviewed 250 documented findings, grouped them into 23 patterns, and prioritized data risks for engineering.
- Own care-module automation strategy across backend, API-contract, and UI layers; clarify risk and fix criteria with product and engineering.

Senior QA Specialist Sep 2024 - Sep 2026

- Investigated conditional forms, role-based workflows, and persistence after save and refresh.
- Maintained personal release tooling that combined Jira, GitHub, and deployment context into updates used by colleagues; corrected stale results and retired unused publishing paths.

Software QA Specialist Apr 2023 - Sep 2024

- Tested healthcare applications across React, GraphQL, and a legacy no-code platform. Documented exploratory, regression, and smoke coverage in Jira and Testmo.

Ultranauts Inc Feb 2020 - Feb 2023 | Remote

Software Quality Engineer II Oct 2021 - Feb 2023

- Planned exploratory and regression tests for multi-role workflows and complex rules. Weighed automation benefits against maintenance cost.

QA Tester / Software QA Engineer I Feb 2020 - Sep 2021

Manual and exploratory testing across client projects.

Selected projects

Personal builds: I define the behavior and checks; AI writes the code.

> **Personal QA workflow.** Designed runbooks linking ticket context, recordings, HAR logs, and GraphQL state. Review caught misleading screenshots and reports that overstated coverage.

> **AL80 Studio.** Shaped keyboard controls and confirmed timing/view-switch fixes on hardware when successful transfer logs still left the old picture on screen.

> **Felt Presence.** Shaped an illustrated reader for a haunted craft shop. Complete, approved story/image pairs publish; unfinished pairs wait.

Skills & tools

QA: Debugging, exploratory and regression testing, test planning, defect investigation, risk prioritization

AI workflows: Workflow design and orchestration, output verification, tool configuration, Model Context Protocol (MCP)

Tools & technologies: Playwright (AI-assisted investigation), Git, Jira, GitHub Actions, GraphQL, SQL familiarity
