KAYLA YOUNG (GILBERT)

Senior QA Engineer | AI Workflows & Internal Tools

Bentonville, AR | Remote | kayla@snackdriven.com
snackdriven.com/portfolio | linkedin.com/in/snackdriven | github.com/snackdriven

SUMMARY

Senior QA Engineer with 6+ years investigating complex workflows, persistence failures, and ambiguous requirements. Designs practical AI-assisted tools and review steps that turn scattered context into work people can act on.

EXPERIENCE

Chorus Innovations
Apr 2023 - Present | Remote

Senior QA Engineer
Sep 2026 - Present

- Directed a platform-wide, four-day AI-assisted staging investigation; reviewed evidence for 250 documented findings and organized them into 23 recurring failure patterns to prioritize data risks.
- Own care-module test automation strategy across backend, API contract, and UI layers; work with product and engineering on risk-based checks and fix criteria.

Senior QA Specialist
Sep 2024 - Sep 2026

- Investigated failures in conditional forms, role-based workflows, and data persistence across save and refresh cycles.
- Designed a personal release-reporting workflow that combined Jira status, GitHub pull requests, and release discussions into Google Docs and Confluence updates used by colleagues.

Software QA Specialist
Apr 2023 - Sep 2024

- Tested healthcare applications across React, GraphQL, and a legacy no-code platform; documented exploratory, regression, and smoke coverage in Jira and Testmo.

Ultranauts Inc
Feb 2020 - Feb 2023 | Remote

Software Quality Engineer II
Oct 2021 - Feb 2023

- Planned exploratory and regression testing for multi-role workflows and complex business rules; identified where automation would justify its maintenance cost.

QA Tester / Software QA Engineer I
Feb 2020 - Sep 2021

Manual and exploratory testing across client projects.

SELECTED PROJECTS

> **Personal QA Workflow.** Designed runbooks and evidence reviews connecting ticket context, recordings, HAR logs, and GraphQL state. Review caught mislabeled screenshots, environment mix-ups, and saved settings that differed after reload.

> **AL80 Studio.** Directed AI-assisted implementation of a keyboard control panel. Debugged a screen that kept the old picture despite successful transfer logs; confirmed timing and view-switch fixes on hardware.

> **Felt Presence.** Shaped a haunted craft shop's reader and recurring AI-assisted content workflow. Connected approved story/image pairs to automatic publishing, with checks that keep incomplete pairs pending.

SKILLS & TOOLS

QA: Debugging, exploratory and regression testing, test planning, defect investigation, risk prioritization

AI workflows: Workflow design and orchestration, output verification, tool configuration, Model Context Protocol (MCP)

Tools & technologies: Playwright (AI-assisted investigation), Git, Jira, GitHub Actions, GraphQL, SQL familiarity
